

Ameer Rubaiawi

Senior Software Engineer (Backend / Full Stack) · Baghdad, Iraq

Phone: +964 773 613 6704 | Email: dhiaaback@gmail.com | GitHub: github.com/ameerdhi7 | LinkedIn: linkedin.com/in/ameerdhi7

SUMMARY

Senior Software Engineer with 7+ years of experience building and scaling production backend systems and full-stack web applications. Strong focus on API design, database performance, reliability/observability, and CI/CD—delivering measurable improvements in latency, incident rate, and operational visibility.

I strive to take on a new backend development role where I can contribute to challenging and impactful projects while growing my expertise.

CORE STRENGTHS

- Backend engineering: .NET, PHP (Laravel), Node.js, REST APIs, service integrations
- Data & performance: MySQL/PostgreSQL, query optimization, reporting, migrations
- Reliability & delivery: monitoring/alerting (Grafana), Docker/Helm, CI/CD, AI-assisted development, mentoring

EXPERIENCE

Asl Al-Uroba — Senior Software Engineer (Hybrid, Baghdad)

Mar 2026 – Present

- Ship features end to end across a React/TypeScript frontend and a .NET backend (Clean Architecture, CQRS/MediatR, PostgreSQL), deployed via Docker, Harbor and Helm.
- Leading the platform's move off Jira to a native task lifecycle with a configurable workflow engine and per-project cutover.
- Built delivery-insights metrics (flow efficiency, cycle time, unplanned-work rate) the previous tooling could not produce.
- Own quality via unit tests, typed API contracts and code review; work AI-first with Claude Code to multiply throughput.

Talabatey — Senior Software Engineer (Remote)

Oct 2022 – Feb 2026

- Led development of customer and operations portals supporting thousands of daily users.
- Built delivery-tracking capabilities that improved order visibility and customer experience.
- Developed KPI and system-health dashboards in Grafana, improving on-call awareness and decision-making.
- Reduced production incidents by ~30% through better monitoring, alerting, and operational hardening.

Talabatey — Full Stack Developer (Remote)

Nov 2020 – Oct 2022

- Maintained and evolved a modular CRM web application using Laravel and its ecosystem.
- Integrated REST APIs with mobile and third-party services; ensured secure, reliable data flows.
- Optimized database queries and reporting pipelines, improving performance by ~40%.

Earlier Experience (Baghdad)

- Halasat ISP — Web Developer (Jan 2020 – Nov 2020): Re-architected core APIs for a Video-on-Demand platform, reducing response time by ~50%.
- Design Center — Web Developer (Jul 2019 – Jan 2020): Delivered responsive websites and automated reporting/data workflows.

EDUCATION

B.Sc. Computer Science — University of Technology, Baghdad

2016–2020

TECHNICAL SKILLS

- Languages/Frameworks: C# (ASP.NET Core), PHP (Laravel ecosystem), TypeScript/JavaScript (React, Vue, Nuxt), Node.js (NestJS, Express)
- Databases: PostgreSQL, MySQL, MongoDB
- Frontend: HTML5, CSS3, Vite, Bootstrap, Tailwind CSS
- DevOps/Tools: Docker, Helm, Harbor, Linux, Git, CI/CD (Bitbucket Pipelines)
- Observability: Grafana
- Platforms: WordPress CMS

LANGUAGES

- Arabic — C2 (Native)
- English — C1 (Fluent)
